DETAILED ACTION

1. In response to the Office action dated April 16, 2004 the Amendment has been received May 12, 2004.

The specification has been amended.

Claims 1-4, 26 and 27 have been canceled without prejudice or disclaimer.

Claims 5-10, 13, 16-21 and 28-30 have been amended.

Claims 5-25 and 28-32 are currently pending in this application.

Allowable Subject Matter

2. Claims 5-25 and 28-32 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 5-7 are allowed because prior art fails to teach or make obvious a method of screening items to detect target object therein, comprising forming a third representation of objects in the item including altering a first representation by changing the estimate of the atomic number of an object based on a second representation of objects as claimed.

Claims 8-17 are allowed because prior art fails to teach or make obvious a method of screening items to detect target objects therein, comprising forming a third representation of objects in the item including altering a representation of an object in a

first representation based on a second representation indicating that a plurality of overlapping objects are represented as one object in the first representation as claimed.

Claims 18-25 are allowed because prior art fails to teach or make obvious a method of screening items to detect target object therein, comprising forming a third representation of objects in the item including altering the effective atomic number and mass associated with objects contained in a first representation based on density of objects contained in a second representation as claimed.

Claims 28-32 are allowed because prior art fails to teach or make obvious a method of screening items to detect target objects therein, comprising indicating an object based at least in part on a first representation and a second representation, wherein the object is indicated when it has an effective atomic number in a predetermined range and a predetermined proximity to another object that has an effective atomic number indicative of material as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
